Organised by the General Engineering Research Institute (GERI),  
Faculty of Technology and Environment, LJMU [www.ljmu.ac.uk/icpm2011](http://www.ljmu.ac.uk/icpm2011)

### **Congress History**

The International Congress of Precision Machining [ICPM] was established in 2001 in response to the increased necessity for ever greater precision in manufacturing production. The Congress originated out of a common agreement between universities of the Czech Republic.

### **Congress Venue**

The event will be held at the Adelphi Hotel, central Liverpool, in close proximity to the University and all amenities.

### **Congress Themes**

The Congress will focus on the following subject areas: advanced manufacturing technologies; ecological aspects of machining; micro- and nano-technologies; machining, machines, tools; metrology and quality control; process monitoring/control; non-conventional machining processes; measurement and analysis of surface quality and integrity; production optimization and economy; adaptive and intelligent control systems; process modelling and simulation; management and organization for quality assurance; Laser manufacturing.
